Visualise
a better
practice

Powerful & portable

I'm **iTerro Element 2**
and I bring innovation
to visualisation

iTerro Element 2 delivers faster scan processing than the current iTerro Element scanner, enhanced ergonomics and high-definition colour imaging, making it the perfect partner for the modern practice.

Experience the next generation

- Next-gen computing means faster scan processing and quicker start-ups than the current iTerro Element scanner¹
- Expanded 21.5" touch widescreen delivers better visualisation
- Integrated battery for uninterrupted scanning²
- Ergonomic, centred cradle provides easy wand access

I'm **iTerro Element Flex**
and I go wherever you go

iTerro Element Flex, a wand-only system with a portable, custom-designed carrying case, lets you bring the technology to even the smallest practice. Enjoy the convenience of on-the-go scanning.³

Experience portability

- Get the speed, reliability and clear imaging you've come to expect from the iTerro Element scanner
- Wand-only system allows for quick and easy transport between offices
- Stunning 3D scans for chairside consults with compatible laptops³
- Carrying case fits the laptop, wand and accessories, with lightweight design and a compact footprint - recommended laptop to be purchased separately³

We're big

in restorative

Think I'm just for Invisalign treatment?
Think again.

Restorative file interpretation

The iTero modeling process helps to ensure efficient laboratory submission, minimize scan retakes and enable consistent restorative outcomes.

Before

After

Open STL export

iTero restorative STL files are open to send directly to your lab or to export from your iTero cloud account.

Expansive lab network

Restorative solutions are now more convenient than ever with iTero's network of over 3,000 laboratories, implant and digital treatment planning providers.

Chairside milling integrations

Our collaborations with Glidewell.io™ and Exocad allow you to export scans directly from the iTero Element interface to CAD software and milling partners, for faster, more precise restorations.*

* Currently available in select markets only.

Seeing is believing

Don't just tell your patients
they need treatment.
Show them why.

Visualisation is an important driver for patient treatment acceptance.

“With the iTero, the visualisation that you get for the patient means the uptake of treatment is much higher, but also their understanding is much more advanced than what it was before.”

—Dr. Lance Knight, UK

iTero scanners are not just impression taking devices. They're much more than that. With software like TimeLapse, you can show patients how their teeth are moving over time, how gingival recession is progressing and so much more—all in real-time. That's the power of seeing is believing.

Invisalign integration

I provide integrated solutions

The Invisalign & iTero solution is one extremely powerful digital solution with the proven ability to grow your practice.

Increase case acceptance

Exclusively powered by iTero scanners, the Invisalign Outcome Simulator helps patients visualize their potential treatment outcome, make real-time adjustments to simulations and easily project corrections, extractions, IPR, etc.

Track progress

See how your patients' new scans compare with their ClinCheck treatment plans with Invisalign Progress Assessment. Use this tool as motivation on compliance or education on treatment tracking.

Plan faster

ClinCheck treatment plans submitted using iTero scans are typically posted, on average, 3 times faster to the Invisalign Doctor Site (IDS) than cases using PVS impressions.⁸

I'm proven to grow practices

A recent peer-reviewed study published by *The Journal of Clinical Dentistry* confirms the introduction of iTero digital scanning with Invisalign treatment increases case volume and drives practice growth.⁹

Within 1 year

the iTero scanner can pay for itself⁹

More cases

5.92

additional Invisalign cases at 12 months

Greater receipts

\$32,560

increases in Invisalign receipts at 12 months¹⁰

Proven digital solution

I'm more than a fast scanner

Integrating digital scanning into your practice requires more than just fast image capture. iTero Element scanners connect rapid image acquisition with high-tech training, technical support and predictable workflow systems.

iTero scanner training

Virtual classroom training transforms the learning experience and is conducted by iTero clinical trainers to ensure integration within the practice.

- 1:1 instructor-led virtual classroom training
- Flexible scheduling reduces practice downtime
- Conducted by manufacturer clinical trainers
- Self-guided online training foundations & video library
- Advanced training webinars

your dental practice.¹¹

Learn more at iTero.com

1. Based on comparison of 40 start-up times between each product: iTero Element and iTero Element 2.
2. With a fully charged battery, the user can scan for 30 minutes without having to plug in for power.
3. iTero Element Flex is recommended to be used with certified laptops, that are to be purchased separately. Please contact your Align Technology representative for more information or view a list of certified laptops at iTero.com.
4. Scan times vary and depend on individual experience. Data on file at Align Technology.
5. Figures updated as of January, 2018. Data on file at Align Technology.
6. Data on file at Align Technology, as of March 5, 2018. Invisalign scans include, but not limited to, additional aligner order scans, progress tracking, and does not reflect total Invisalign case shipments.
7. 25% faster scan processing with the iTero Element 2 as compared to the iTero Element, and based on comparison of 40 nvisalign scans and 40 restorative scans with 3 prep teeth processed by each product: iTero Element and iTero Element 2.
8. Data on file at Align Technology, as of April 10th, 2018.
9. Retrospective data evaluation and quantitative analysis completed by Dr. Mackay, University of Memphis. 495 orthodontic practices worldwide. Mackay MM, et al. Acquisition of a digital intraoral scanning device: An examination of practice volume changes and the economic impact via an interrupted time series analysis. The Journal of Clinical Dentistry 2017; 28 (Suppl): S1-S5.
10. Valuation based on \$5,500 Invisalign case fee. Median case fee of Invisalign treatment is often \$3,000-\$8,000 in the U.S. per Invisalign.com website.
11. More power, convenience and capabilities compared to the iTero Element system.
